

Oxygen Therapy

Description

This training enables users to administer oxygen safely and effectively, for casualties with breathing difficulties. Delegates will learn how and when to administer oxygen to a casualty and the safety concerns along with carrying, storing and administering it.

This course is suitable for First Aiders, Emergency First Aiders, dental practitioners and dental care professionals, nurses, healthcare professionals and others working in an environment where oxygen is available for casualty welfare.

Duration

This is a classroom-based course of 3 guided learning hours. Dependent on the learner's experience, there may be some pre-course or post-course reading.

Syllabus

The course is made up of theoretical sessions delivered by your instructor who will provide a detailed course programme.

A range of subjects are covered that will enable:

- **The learner to have an understanding of the respiratory system.**
- **The learner to have an understanding of the circulatory system.**
- **Understanding when to give O₂**
- **Identifying the types of equipment.**
- **Understanding safety and storage when using O₂.**

Certification

A certificate of attendance will be awarded on successful completion of this training. This course is also suitable for Continual Professional Development (CPD).

Numbers

A maximum of 12 students can be accommodated on this course and all learners must be a minimum of 16 years of age to qualify.
